 We quote today's values F. O. B. Fargo or Moorhead, subject to market changes and unsold as follows:

INTERSTATE BRAND SEED CORN

Germination over 90%

NORTH DAKOTA GROWN	Per bu.
Minnesota 13, 1928 Crop Cass Co.	\$4.00
Haney Strain 13, 1928 Crop Cass Co.	4.00
Early Yellow, 1928 Crop Cass Co.	4.00
Falconer Semi Dent, Burleigh Co.	3.75
White Flint, Burleigh Co.	4.00
Squaw Flint, Burleigh Co.	4.00
Gehu Flint, Burleigh Co.	3.50
Northwestern Dent, Burleigh Co.	4.00
Golden Dent, Cass Co.	4.00

We recommend our Minnesota 13, 1928 crop, Cass Co. N. D. to those farmers who use corn as a grain and want ripe, well matured ears. The 1929 crop of N. D. seed corn is very limited and you should order early.

Please note that our **Interstate Brand** Seed Corn is of the usual high standard of quality. It is priced reasonably so that our dealers can successfully meet outside competition and still make a fair profit.

EXTRA EARLY STRAINS	Per bu.
Northwestern Dent	\$2.90
Minnesota 13, Haney Strain	2.90
White Rustler Dent	2.90

This corn was raised for us this season in Meeker Co., Minn. from North Dakota seed. We recommend it as a good producer of grain and fodder.

FOR SILAGE—MINNESOTA GROWN

Minnesota 13..... 2.25

FODDER CORN

Yellow Fodder..... 1.35
 St. Chas. Red Cob..... 1.45

If purchaser does not accept the goods on those terms, he must notify us at once and we will give instructions for disposition of goods.

INTERSTATE SEED & GRAIN CO., Fargo

HUBBARD'S SUNSHINE FEEDS

Feeding Concentrates

HUBBARD'S Sunshine Feeds contain no farm grown grains but are made up of nineteen concentrates, giving a 32% protein content in the fattening feed and a 33% protein content in the dairy feed. These Concentrates mixed with your farm grown grains will provide you with a low cost dairy feed and with a low cost feed for hogs and fattening cattle. By buying these Concentrates you are not paying the freight back and forth to the Terminals on farm grown grains that you are producing on your own farm.

Hubbard's Sunshine Feeds are placed with the farmer in competition with any other feed and if better results are not secured for the money invested, the farmer's money is gladly refunded. These feeds are gaining in popularity thruout the Northwestern states; they are the cheapest feeds, results considered, on the market today. Ask us for circulars descriptive of the feed and ask us for a dealer's proposition for handling this feed in your territory. You will be doing a service to your dairy men and feeders.

Protect Your Grain Profits Increase Your Crop Yields with CERESAN

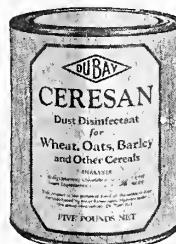

Why lose part of your grain crops through smuts and other seed-borne diseases? Prevent these diseases and protect your profits by treating all seed grains with Ceresan before sowing. Effective in controlling stinking smut and seed-borne flag smut of wheat; seedling blight of cereals caused by seed-borne scab; smuts of oats; covered smut and stripe of barley; kernel smuts of sorghums and millets; and seed-borne stem smut of rye. Seed may be treated in spare time. Ceresan is harmless to seed and does not injure grain drills. Use 2 oz. per bushel of seed wheat, rye, sorghums or millets; 3 oz. for oats and barley.

Ceresan increased this oats yield 19.1 bushels per acre and gave perfect smut control.

The only seed treatment you need for
Wheat
Oats
Barley
Rye
Sorghums
Millet
